Sweave Example 1

Friedrich Leisch

November 19, 2013

In this example we embed parts of the examples from the `kruskal.test` help page into a L^AT_EX document:

```
data(airquality, package = "datasets")
library("stats")
kruskal.test(Ozone ~ Month, data = airquality)
```

which shows that the location parameter of the Ozone distribution varies significantly from month to month. Finally we include a boxplot of the data:

```
library("graphics")
boxplot(Ozone ~ Month, data = airquality)
```
